

DVS 14
**Sectional directional
control valve**

TECHNICAL CATALOGUE

Features

Simple, compact and heavy duty designed sectional valve from 1 to 10 sections for hydraulic systems with fixed or variable displacement pumps.

- Available in left or right inlet configurations.
- Working sections with and without port valves arrangement.
- Flow Unloader configuration available.
- Proportional electrohydraulic controls.
- Optional spool position sensors.

Additional information

This catalogue shows the product in the most standard configurations.

Please, contact Sales Dpt. for more detailed information or special request.

WARNING!

All specifications of this catalogue refer to the standard product at this date.
Walvoil, oriented to a continuous improvement, reserves the right to
discontinue, modify or revise the specifications without notice.

WALVOIL IS NOT RESPONSIBLE FOR ANY DAMAGE CAUSED BY AN
INCORRECT USE OF THE PRODUCT.

Working conditions

This catalogue shows technical specifications and diagrams measured with mineral oil of 46 mm²/s - 46 cSt viscosity at 40°C - 104°F temperature.

Nominal flow rating	standard	80 l/min	22 US gpm
	Flow Unloader valve configuration	120 l/min	32 US gpm
Max. pressure ⁽¹⁾		350 bar	5100 psi
	with mechanical controls	20 bar	290 psi
Back pressure (max.) on outlet T port	with hydraulic controls	20 bar	290 psi
	with electrohydraulic controls	5 bar	73 psi
Standard internal leakage A(B)->T	$\Delta p = 100 \text{ bar} - 1450 \text{ psi}$	8 cm ³ /min max.	0.5 in ³ /min max.
Fluid		Mineral oil	
Fluid temperature range	with NBR (BUNA-N) seals	from -20°C to 80°C	from -4°F to 176°F
	operating range	from 15 to 75 mm ² /s	from 15 to 75 cst
Viscosity	min.	12 mm ² s	12 cst
	max.	400 mm ² s	400 cst
Contamination level		-/19/16 - ISO 4406	-/19/16 - ISO 4406
Environmental temperature for working conditions	with mechanical, hydraulic, electric and electrohydraulic devices	from -40°C to 60°C	from -40°F to 140°F
Tie rods tightening torque (ch 13)		40 Nm	29,5 Nm

NOTE - ⁽¹⁾ Intermittent pressure at max. 250,000 cycles with specific internal testing.

- For different working conditions please, contact our Sales Department.

Proportional electrohydraulic controls

Performance data

Following specifications are measured with:

- mineral oil of 46 mm²/s (46 cSt) viscosity at 40°C (104°F) temperature.
- standard spools, connecting P⇒A⇒B⇒T ports without flow multiplication
- 12 VDC and 24 VDC nominal voltage with ± 10% tolerance.

The following electrohydraulic controls need a CED400W electronic unit; for information, please contact our Sales Department.

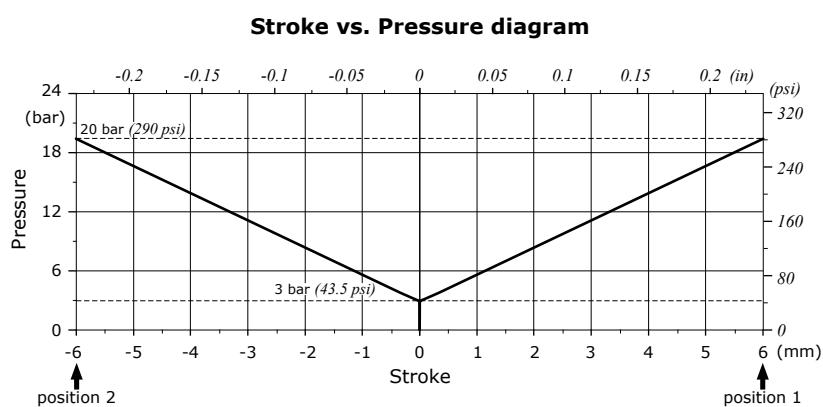

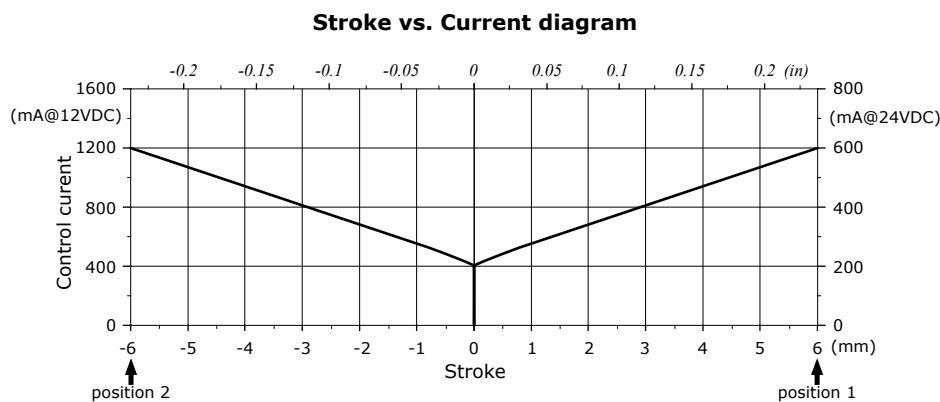

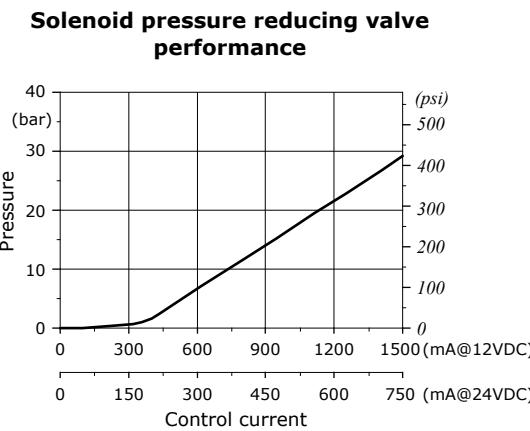

A and B sides spool controls

Electric specifications

Coil impedance	12 VDC 24 VDC	4.7 Ω 20.8 Ω
Max. operating current	12 VDC 24 VDC	1.5 A 0.75 A

Left Inlet configuration example

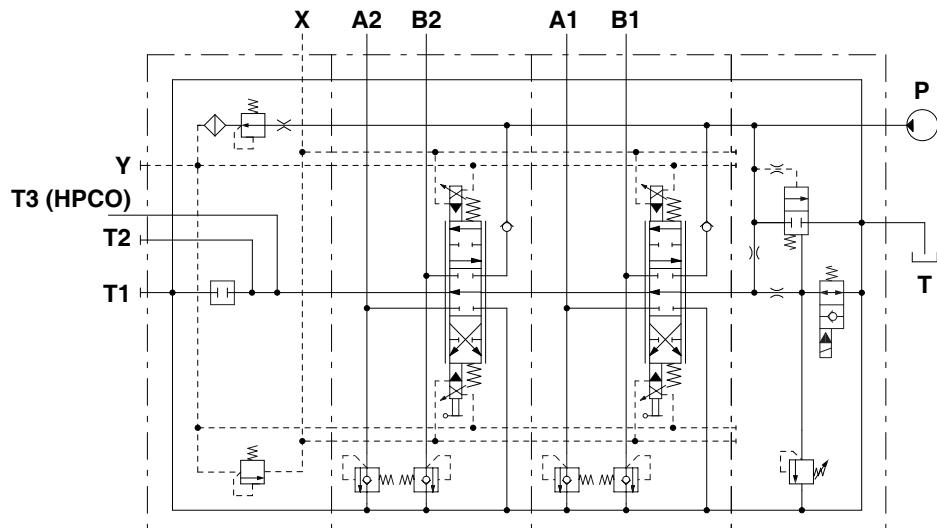

Dimensional data and hydtraulic circuit

The DVS14 sectional valve is available in Flow Unloader configuration as well.

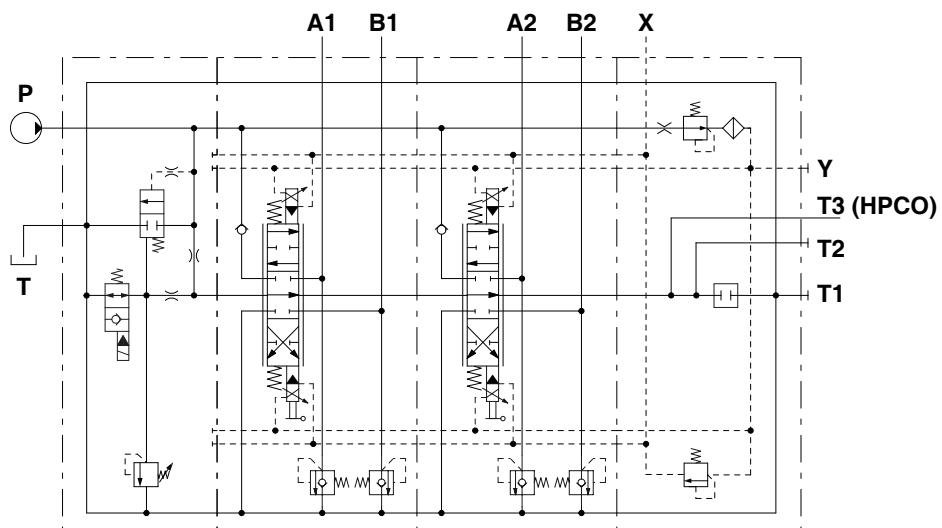

Feature of this configuration is to limit flow on "free flow line" (typically 20 l/min - 5.3 US gpm) making it possible to manage all flow (80 l/min - 21 US gpm) by working ports, when the spools are operated till to stroke end.

The Flow Unloader system is configured with special inlet section, fitted with compensator and dedicated spools.

Right Inlet valve with electrohydraulic controls configuration:

DVS14/2/MRQ-V1A(200)V7B-C12DI-E-MA-X-G05/W001Q-HP04-FP04-B12AJ-RP1-G04.03TF-PA(100)\03TF-PB(100)/

Main rules

The DVS14 valve is assembled and tested as per the technical specifications of this catalogue.

Before the final installation on your equipment, please follow the below recommendations:

- the valve can be assembled in any position; in order to prevent body deformation and spool sticking, mount the product on a flat surface;
- In order to prevent the possibility of water entering the spool control kit, do not use high pressure washdown directly on the valve;
- prior to painting, ensure that plugs on normally open ports are tightly in place.

With steel and rubber washer	70 (51.6)	60 (44.3)	70 (51.6)	16 (11.8)	16 (11.8)
UN-UNF	1 1/6-12 (SAE 12)	7/8-14 (SAE 10)	1 1/6-12 (SAE 12)	7/8-14 (SAE 10)	9/16-18 (SAE 6)
With O-Ring seal	95 (70)	90 (66.4)	95 (70)	90 (66.4)	30 (22)

NOTE – These torques are recommended.

Assembly tightening torque depends on many factors, including lubrication, coating and surface finishing.

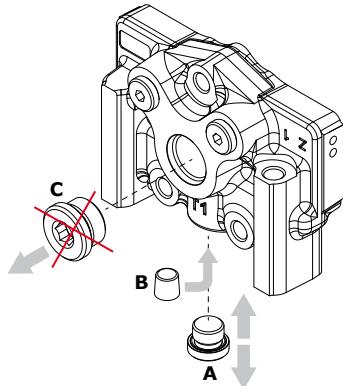

Carry-over transformation rules**KZM type outlet section**

In order to transform the KZM outlet section in a HPCO carry-over configuration (picture 1), it is necessary to unscrew the **A** bottom plug, to insert the tapered **B** plug, **413010203** code, and to screw the **A** plug.

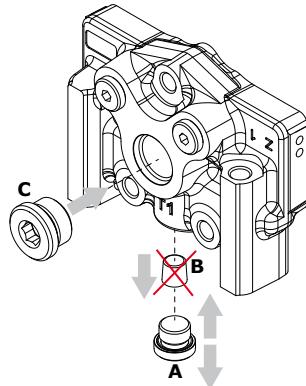

If the **C** plug is present, it is necessary to remove it from T1 port: this one will be used for HPCO.

If the HPCO port is no longer used, please remove the **B** tapered plug (picture 2) and, if necessary, close the T1 port with the **C** plug, **430000020** code.

Picture 1

Picture 2

**Wrenches and tightening torques**

A = allen wrench 6 - 40 Nm (29.5 lbf ft)

B = allen wrench 6 - 40 Nm (29.5 lbf ft)

C = allen wrench 12 - 90 Nm (66.4 lbf ft)

KZP type outlet section

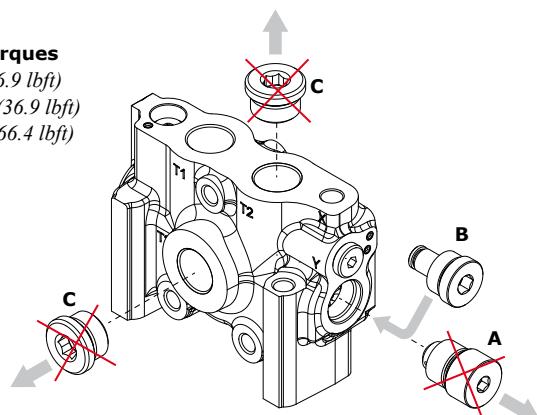

If needed, a HPCO carry-over configuration is available on T2 or T3 ports.

It is necessary (picture 3) to remove the **A** backpressure valve and replaced it with the **B** plug, **4300C3004** code.

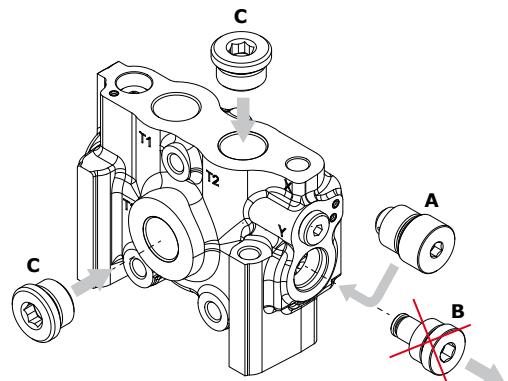

Select the port for HPCO configuration and remove one of the **C** plugs.

If the HPCO port is no longer used, please remove the **B** plug (picture 4), insert the **A** backpressure valve, **3202C3004** code, and close both the T2 and T3 ports with the **C** plug, **430000020** code.

Picture 4

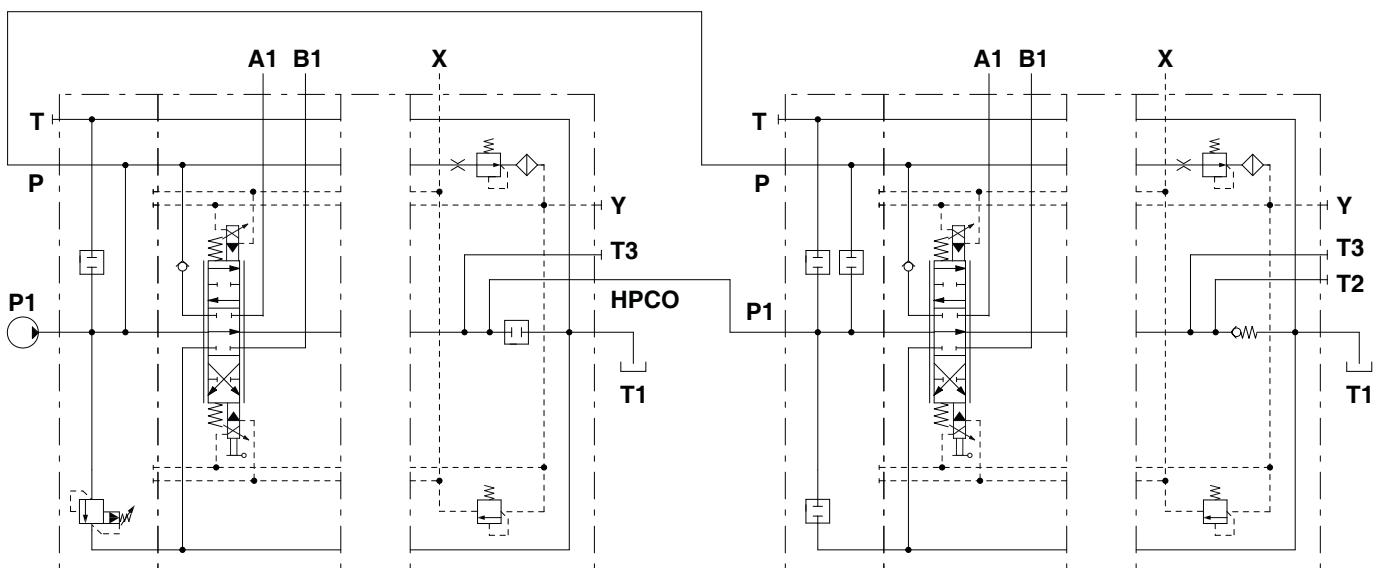

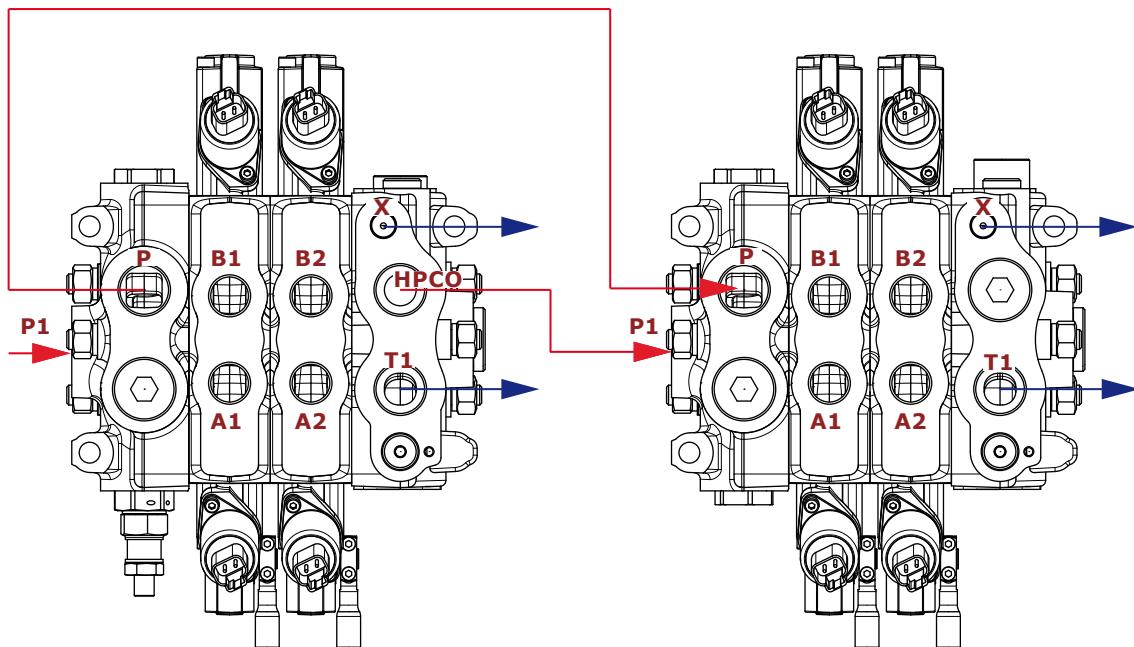

Two valves connection

This system, named IZ, allows the contemporary use of nr. 2 DVS14 valves when they are connected in parallel circuit and to the same pump.

The pump connected to the first DVS14 valve feeds also the pressure line of the second valve, while the "free flow line" from the HPCO of the first valve is connected to the "free flow line" of the following valve.

The pump can be connected indifferently to P or P1 ports of the first valve, while the HPCO must be connected to P1 port of the second DVS14 valve.

Features

- Nominal voltage tolerance : $\pm 10\%$
- Power rating : 19.2 W - 12/24 VDC - 48 RAC
: 19.1 W - 28 VDC
: 19 W - 10/14/48/110/220 VDC
24/110/220 RAC
- Max. operating current : 1.90 A - 10 VDC
: 1.60 A - 12 VDC
: 1.36 A - 14 VDC
: 0.80 A - 24 VDC
: 0.68 A - 28 VDC
: 0.40 A - 48 VDC
: 0.17 A - 110 VDC
: 0.09 A - 220 VDC
: 0.89 A - 24 RAC
: 0.45 A - 48 RAC
: 0.19 A - 110 RAC
: 0.09 A - 220 RAC
- Coil insulation : Class H (180°C - 356°F)
- Weather protection : IP65 - ISO4400
: IP69K - Deutsch DT
: IP65 - AMP JPT
: IP67 - Weatherpack
: IP67 - Metri-pack
- Insertion : 100%
